

# Money2069

A vision for a neutral, state-free,  
spending-power stable currency system.

Silvio Hayek  
money2069.org  
info@money2069.org

**Abstract.** Money2069 is the vision to create an interplanetary, state-free, neutral, spending-power stable currency system for active use by the year 2069. Current currency systems such as the one surrounding US-Dollar are insatiable. We need a system that is immutable regardless of the success of any nation state. Bitcoin is amazing, but does not work as money because it won't be spending-power stable. In order to create this currency system, we do require a coordination and funding layer that aligns contributors on the vision and enables them to make it a reality. The neutrality of such a currency system requires a funding mechanism that is detached from the system itself. The system is cross-funded via M69 ownership of its founders and drivers. The boldness of the vision requires strongly aligned incentives across thousands of people across the globe that believe in it to make it a reality. It won't be easy. But Money2069 will make it feasible.

The token M69 proposes a community-driven approach to funding and development, ensuring that the currency remains a public good, free from individual profit motives.

*„If you don't believe it or you don't get it, then I  
don't have time to try to convince you.“*

Satoshi Nakamoto - Inventor of Bitcoin

## 1. Introduction

Despite centuries of human progress, the essence of money hasn't evolved much since the days of the Roman Denarius. We've advanced in technology, science, and globalization, yet our monetary systems remain tied to nation-states and central authorities. This linkage makes currencies vulnerable, mirroring the rise and fall of political entities and hindering long-term economic stability.

History shows that nation-states and their currencies are transient. As long as money is tied to national governments, it will mirror the rise and fall of political systems. Imagine, however, a currency completely detached from these constraints—one that adapts elastically to inter-planetary demand, remains absolutely neutral, and serves every person equally, free from the limitations of national borders. Such a currency could unlock the true potential of money, fostering growth, innovation, and prosperity on an inter-planetary scale.

While science breaks new ground in exciting fields like rocket engineering, it often overlooks money—the very bedrock of value creation and social interaction. By redesigning money itself, we can ignite improvements across all sectors, fostering a sustainable future in an era driven by AI and globalization.

Money should be as accessible and ubiquitous as the air we breathe or the sun that warms us. It should always be available in sufficient amounts to support sustainable wealth creation, progress, and innovation whenever we need it.

The greatest challenges humans face are socio-economic, not technological. In an era increasingly driven by AI and rapid globalization, we need a new monetary paradigm. One that champions free markets, embraces technological advancement, prioritizes human prosperity, and considers the well-being of future generations.

I invite you to become part of Money2069.

## 2. Problem

We stand at a pivotal moment in history where the very survival of human civilization hangs in the balance, threatened by deep-seated flaws in our economic systems. Despite leaps in science, technology, and collective understanding, we are **paradoxically distant** from the utopian society these advancements should have ushered in. Our monetary systems, riddled with systemic issues, are designed for short-term profits and are buried under mountains of debt. They demand perpetual, **unsustainable growth**, with money generated as debt with interest,

leading to inefficiencies and dependencies that could precipitate the **downfall of nations** and their currencies.

The benefits of creating money, or **seigniorage**, are disproportionately enjoyed by private banks, while the public grapples with inflation, debt cycles, and economic instability, skewing wealth distribution and eroding financial stability. This cycle of boom and bust is what Money2069 seeks to dismantle by incubating a currency system that fosters sustainability and equity.

Bitcoin, while groundbreaking for its decentralized approach, suffers from **volatility and deflation**, making it less than ideal for daily transactions. It's an excellent store of value but not conducive to stabilizing purchasing power.

What we need is a currency that's neutral, beyond the control of any single entity or state, serving the collective good over individual or national interests. This currency must be of the people, for the people, devoid of the corrupting influence of venture capital or governmental manipulation. Traditional funding, particularly venture capital, is **misaligned** with the creation of such public goods as money, especially when the aim is not profit but equitable access and stability. Money should serve society, not enrich a select few or come with high fees.

The most significant challenge we face isn't technological; we already possess the tools and are advancing them further. In an AI-dominated future, new **socio-economic challenges** arise from the integration of AI into our social systems, potentially leading to job displacement, shifts in wealth and power, and ethical concerns regarding AI governance over financial mechanisms. How does humanity prosper if most wealth is generated by AI?

The current **incentives** in the crypto world are misaligned, often leading to founders launching tokens, dumping them, and moving on without fostering long-term commitment. Over the coming years, our biggest challenge will be to create a socio-economic framework that aligns thousands of people globally around a shared vision. We must design mechanisms that create incentives and benefits for everyone working towards and succeeding in this common goal.

### 3. Solution

Money2069 is the solution. Money2069 will fix it. Money2069 is a movement, a community, and a funding mechanism united by a singular vision: to establish a credibly neutral,

state-free, spending-power stable, interplanetary currency system by the year 2069. With the ticker M69, this initiative represents a groundbreaking step towards a future where money serves all of humanity in an age of AI and beyond.

Money2069 commits to backing any endeavor that contributes to this grand vision, providing the resources, community support, and strategic direction needed to bring this new monetary paradigm into existence. It's a call to action, a pledge to humanity's future where money is a tool for universal prosperity, not division or control.

Money2069 transcends the historical evolution from Gold to Fiat to Bitcoin, aiming for a system that embodies Bitcoin's spirit of decentralization while providing FIAT-level stability and utility.

The vision of Money2069 is for a :

- ❖ **Currency System.** Importantly, the solution must not be a single currency, but bring to live a system of currencies that can interact with each other seamlessly. It would be foolish to think that a single currency could be a perfect fit for millions of microeconomics on an inter-planetary scale. The system will serve as a communication standard
- ❖ **Credibly Neutral**, like the air or the sun, free from political or corporate sway, ensuring fairness and accessibility for everyone.
- ❖ **Independent of states**, crafted to endure beyond the lifespan of any government, securing its role as a timeless economic tool.
- ❖ **Stable in purchasing power**, designed to protect against the economic volatility that afflicts current monetary systems.
- ❖ **Interplanetary in scope**, poised to be the economic backbone for human activities both on Earth and in the vastness of space as we explore and settle new frontiers.
- ❖ **Adaptive to the evolving needs of society and technology.** Designed for eternity. To serve perpetual human success.

Money2069 gives birth to this vision via \$M69:

- ❖ **Aligned Incentives:** Most important for the success of Money2069 is the alignment of leaders, founders, and entrepreneurs that work towards making the vision a reality. With its appeal to a specific type of persona, and the community's means to distribute it to the right people, M69 is this alignment layer.

- ❖ **Funding:** With the boldness of its vision and the strength of belief from its supporters, M69 is designed to go up forever and create unwavering wealth for founders and entrepreneurs working to make Money2069 a reality. M69 will provide the necessary means to avoid reliance on VC funding for the creation of the projects leading to the realization of Money2069.
- ❖ **Vision Ownership:** M69 represents ownership in Vision Money2069, ensuring that those who contribute to the vision are also stakeholders in its success.
- ❖ **Empowerment:** Empowering leaders to make Money2069 a reality by providing them with the tools, support, and motivation through M69.
- ❖ **Believe:** Fostering belief in the vision by aligning the financial incentives of the community with the long-term goals of Money2069.
- ❖ **Fair Launch:** Universal access with 100% of the supply offered in a liquidity pool as a fair distribution mechanism. Allowing anyone who believes in the vision to become an early owner in its shared success.
- ❖ **Community:** A token-gated community for owners of M69 ensures high-quality interaction, where discussions and decisions are made by those who have a stake in the system's success, fostering a dedicated and engaged ecosystem.

#### 4. Mission

The vision of Money2069 is to establish a currency system that is neutral, detached from state influence, stable in spending power, and capable of functioning across an interplanetary scale, all tailored to serve humanity in the AI-dominated future.

To bring this vision to life, we must unite believers under the banner of Money2069. We need to demonstrate our unwavering support, not just through belief but through monetary alignment via M69.

Our mission involves cultivating a vibrant, well-funded community and team dedicated to this cause. If you share our belief in this mission, the way to show it is by taking ownership of M69 and actively advocating for the vision amongst potential founders of projects that help to make Money2069 a reality. Our commitment extends to ensuring that the distribution and ownership of M69 are both equitable and purposeful. We aim to place M69 in the hands of individuals and organizations actively contributing to the realization of the Money2069 vision, thereby fostering a truly community-driven, merit-based economy.

## 5. Core Principles

### **Humanity First**

At the heart of Money2069 lies the belief in human prosperity. We aim for a world where every person enjoys equal opportunity, where no one faces discrimination, and where fairness prevails. We envision a single, universal coordination layer that is open to all, immutable, and designed to foster the collective success of our species. We are all on Team Humanity, striving for a future where we all succeed together.

### **Technology as a Catalyst**

We acknowledge that our species' advancement is deeply intertwined with the technology we create. Money2069 is dedicated to sparking and sustaining creativity and innovation, ensuring that technological progress is harnessed to benefit every individual, propelling humanity forward.

### **Bitcoin as an Anchor**

Bitcoin is revered as the ultimate anchor of value and the ledger of truth, essential for providing stability and a verifiable record in our economic system. Yet, it falls short as an active-use currency due to its inflexibility in meeting the fluctuating demands of money supply. Money2069 leverages Bitcoin's strengths by using it as a value anchor, while it itself acts as a dynamic value multiplier, facilitating the practical use of money across humanity.

### **Long-Term Vision**

We reject the pervasive short-termism and profit-centric thinking that plagues our society and the crypto space. Money2069 stands for sustainable, long-term value creation, dedicated to empowering generations to live in unity with the universe, ensuring that our actions today lay the groundwork for a thriving, interconnected future for all of humanity. Money2069 aims to instill a culture of stewardship for future generations, where economic decisions are made with long-term planetary health in mind.

## 6. What is M69?

M69 is the beacon for a new era of human coordination. Far beyond being merely a state-free, neutral, interplanetary currency system, M69 is a vessel for endless possibilities, created by the community, for the community, with the aim of making this visionary monetary system a reality.

M69 stands as the unifying symbol for all who envision a currency free from state influence, stable in value, and universally accessible, unbound by nations.

Technical Overview:

- M69 operates as an ERC-20 token on Ethereum, with the contract address **0x20b4be7df8e79d75207339dbd4d8498b6ea93e69**.
- Total Supply: 2,069,000,000,000
- Functionality: The sole smart contract functions are “Approve” and “Transfer”.

Initial Token Distribution:

- M69 tokens are initially offered on decentralized exchanges across three blockchains:
- 

Chain	Bridge	DEX	Initial Liquidity	Pool Contract
Ethereum	-	Uniswap	2.069 ETH + 689,666,666,667	0xaaff54b2355 eed8425800dd 57938896164 2fb47f
Solana	Wormhole	Jupiter	20.69 SOL + 689,666,666,667	TBD
Base	Superbridge	Aerodrome	2,069 USDC + 689,666,666,666	TBD

- **Liquidity Lock:** All liquidity provided across these chains is locked in a smart contract until 2069, ensuring a steadfast commitment to the vision.

**Future Rewards for Holders:**

- By the year 2069, holders of M69 will have the opportunity to claim LP tokens, reflecting their stake in the system's success.

### **Why become a part in Money2069?**

M69 reflects ownership in the vision of Money2069. As an impartial, and neutral community-owned currency and recognize the increasing relevance of a currency system that puts humanity first. M69 represents ownership in a future where money transcends national borders and political influence, offering stability and equity across the cosmos. Your commitment is a direct contribution to the funding mechanism that will drive this transformative vision forward, making M69 not just a token, but a movement towards a more equitable and sustainable economic future for all. If you believe in fostering a world where innovation, fairness, and long-term prosperity are paramount, then M69 is your gateway to participating in and shaping this new monetary paradigm. It's about aligning your financial support with your belief in a better future for all of humanity, where each individual can share in the collective success and growth of our species.

## **7. Call to Action**

Anon, it's time to elevate your voice and commitment. Support this revolutionary vision by joining Money2069 and becoming a shared owner in it's success. Together, we'll meme this into reality, securing your stake in a future where currency aligns with humanity's success.

**"Think bigger"**. Humanity's progress demands that you take ownership over \$M69. It's a self-fulfilling prophecy. Our goal? To have every person on Earth holding at least 2,069 M69 tokens. We reject a path of airdrops; we demand conviction from our community. We need you to believe, to claim ownership, to have skin in the game.

By holding M69, you're signaling your conviction for a mission to forge a currency system that's credibly neutral, free from state influence, and stable in purchasing power by 2069. This isn't just about creating a new financial paradigm; it's a movement towards a new era of economic interaction, where money fosters unity and growth.

Your support for Money2069 is a vote for a future where money is a tool for collective prosperity. Remember, neutral money won't come from public companies; it needs founders with wealth and a mission-driven ethos.
